

A BOOK OF THE N A M E S O F A L L

Parishes, Market Towns, Villages, Hamblets, and
Smallest Places, in
ENGLAND and *WALES*.

Alphabetically set down, as they be in every Shire. With
the Names of the Hundreds in which they are, and how many
Towns there are in every Hundred.

So that naming any Town or place in *England* and *Wales*, you may
presently in the Alphabet find it, and know in what Shire and Hundred it
is, and so know the distance from it to the Shire Town, and in the large
Table for Shires in *England*, how far to *London*, or from it, to any other Town
in *England*.

Together with a Catalogue of the Market Towns, Castles, Parish
Churches, Rivers, Forrests and Parks; and also the Length, Breadth and Cir-
cumference of every particular Shire.

A work very necessary

For Travellers, Quartermasters, Gatherers of Breeds, Strangers, Car-
riers, and Messengers with Letters, and all others that know the name of
the place, but can neither tell where it is, nor how to go unto it.

If you would find out any Shire, note that the Shires lie Alphabe-
tically, beginning with *Bark-shire*, and so following
accordingly.

Summa cuiusque virtus pulcherima merces.

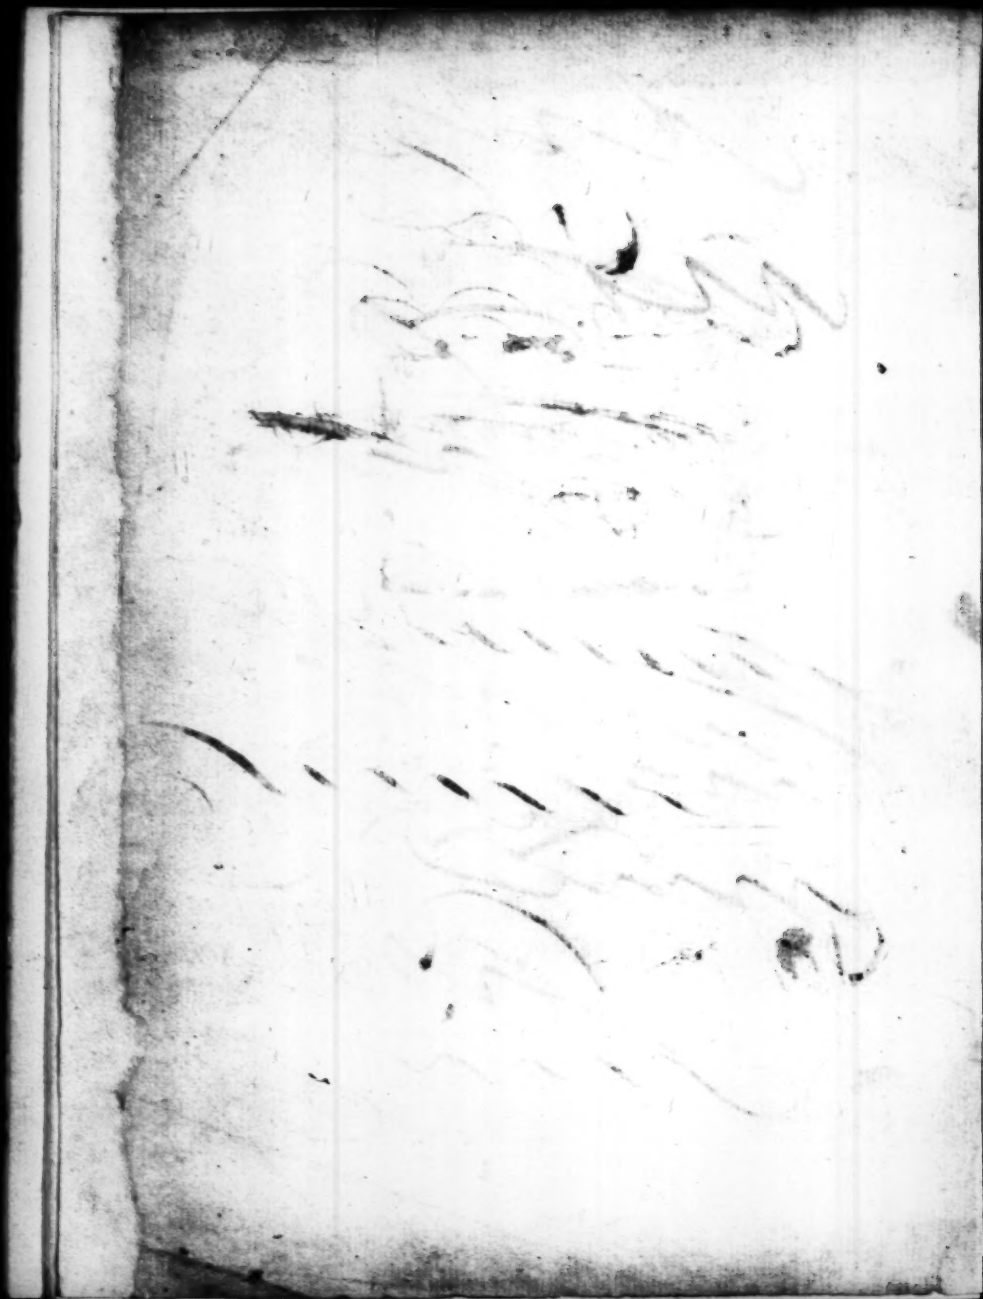

London, Printed by S. S. for John Garret, at his Shop as you go
up the Stairs of the *Royal Exchange* in *Cornhill*: Where is also sold all
sorts of large and small Maps of the World, or any particular part
thereof, with variety of Prospect Cities. 1677.

1-6

My dear
Mother
I have just received
your letter of the 6th

and was very
glad to hear
from you. I am
well and hope
this finds you the same.

John Prestlove

John L. Bulling

Shires	25	64	123	3725	554	256	31	68	121			855

The use of all the ensuing Tables.

TO know the distance between any two Cities or Towns in any of these Tables, seek the places desired in the upper and side Catalogues of Towns, and direct your eye from either place between the lines both from above and from the side, and where the lines meet in square you shall find the number of miles. *For Example*: If you would know how far *Lincoln* is from *Exeter*, look in the Card of shire Towns, and find *Lincoln* in the side, and carry your eye directly from thence between the lines untill it come under *Exeter*, and where they meet in square you shall find 178, which is the distance of miles.

If you find any Town in the side which will not extend to make a square with the desired Town above, then look for the Town which you find in the side in the upper part, and the upper part in the side. *For Example*, If you desire to know the distance between *Gloucester* and *Oxford*, if you look *Gloucester* in the side, you cannot bring *Oxford* in a square with *Gloucester*, but if you look *Gloucester* above and *Oxford* in the side, you shall find the square and the distance 35 miles, and so of the other ensuing Tables.

To know whether you are to travell East, West, North or South, from the place where you are, to the place where you intend to goe, and through what shires you must pass.

Look in the small Mapp of England, placed before the great Table of shire Towns, and draw a straight line from the next shire Town lying in your way to that shire Town which is next the place whither you desire to goe, and you shall immediately see whether your Journey be East, West, North or South; and what shires the line brings you through, those shires you must pass. *As for Examples*: If you would travell from *London* to *Torke*, you will perceive by the mapp that it lieth North from *London*, then draw a line or carry your eye straight from *London* to *Torke*, and you shall find the way lyeth through *Middlesex*, *Hertford* shire, *Huntingdon* shire, *Northampton* shire, *Lincoln* shire, *Nottingham* shire, and *Torke* shire; and so for any other place.

Again to know what market Towns lie in your way, which way soever you travell.

When you have seen in the generall Mapp what Shires you are to pass through, observe whether you must pass through the middle or the skirts of each Shire, then turn to the Tables of those Shires, and at the foot of each of them you shall have a Mapp, wherein the Towns are signified as they lie in every Shire by the first letter of every Town, and if you must pass through the middle of the Shire, then the letters about the middle of the Mapp declare the Towns by which you must go, but if through the skirts of the Shire, then the letters in the skirts of the Mapp are your direction.

W. H. Gay

Handwritten cursive text, likely a signature or decorative flourish, spanning the width of the page. The text is written in a highly stylized, flowing script. The first line appears to be a name, possibly "Elizabeth", followed by several lines of decorative flourishes and a final line that may be a date or location, possibly "17th Nov 1797".
